KARTHIK G KASHYAP

+91 9483179122 | karthikgkashyap70@gmail.com | LinkedIn | github.com/Karthikgkashyap

Professional Summary

Motivated BCA graduate and aspiring Software Developer with internship experience in Python full-stack development and machine learning. Skilled in building database-integrated web applications, REST APIs, and AI-powered solutions using Python, Flask, JavaScript, PostgreSQL, and Git, with additional experience in Java, C++, SQL, and AWS.

Technical Skills

- **Programming Languages**: Python, Java, C++, JavaScript
- **Web Technologies**: HTML5, CSS3, JavaScript, Flask, REST APIs
- **Databases**: MySQL, PostgreSQL
- **Tools & Platforms**: Git, GitHub, VS Code, AWS
- **Other**: Prompt Engineering, AI Chatbot Development, Machine Learning (Scikit-learn, Pandas, NumPy, Matplotlib)

Experience

EduPheonix Solutions **Feb 2026 - Mar 2026**

Machine Learning Intern

- Applied Python libraries including Pandas, NumPy, and Matplotlib to perform data analysis, visualization, and preprocessing on real-world datasets.
- Implemented and evaluated machine learning models using Scikit-learn, covering classification and regression fundamentals.

Ethnotech Academy **Jan 2026 - Feb 2026**

Python Full Stack Intern

- Developed and deployed full-stack Python web applications using Flask, HTML5, CSS3, and JavaScript while managing source code with Git.
- Built an AI-powered chatbot integrated with a PostgreSQL database to support dynamic, real-time query resolution.

Projects

Smart Agro Recommendation System

- Python, Pandas, NumPy, Matplotlib, Scikit-learn, HTML5/CSS3
- Developed a machine learning web application in Python that predicts optimal crop recommendations by analyzing multivariate environmental inputs, including nitrogen, phosphorus, temperature, rainfall, and humidity, with a trained classification model.

AI Chatbot with Database Integration

- Python, Flask, HTML, CSS, JavaScript, PostgreSQL
- Built an AI-powered chatbot using Python and Flask that processes natural-language queries and delivers intelligent, context-aware responses through a web interface.

Office Task Management System

- Python, Flask, HTML, CSS, JavaScript, PostgreSQL
- Developed a web-based task management platform for assigning, tracking, and updating team tasks in real time.
- Implemented team collaboration features and a centralized dashboard to improve productivity and workflow visibility.

House Price Prediction

- Python, Pandas, NumPy, Matplotlib, Scikit-learn
- Built a regression model to predict residential house prices based on multiple engineered features.
- Performed exploratory data analysis, feature engineering, and model evaluation using Scikit-learn pipelines.

Education

Vidyavahini First Grade College **Oct 2023 - Jun 2026**

Bachelor of Computer Applications (BCA) *Tumakuru, Karnataka*

- **GPA:** 8.50/ 10.0

Certifications

- Introduction to Python: Infosys Springboard **2025**
- Introduction to UI/UX: Great Learning **2025**
- AWS Training Certification: Amazon Web Services **2025**

Accomplishments

- **2nd Place, Daksha Carnival Model Display:**Live demonstration of hacking and prevention measures, Vidyavahini First Grade College.
- **2nd Place, Clone Web App Expo:**Built a Netflix streaming platform clone application, Vidyavahini First Grade College.
- **Hackathon Participant:**Developed an innovative solution within a 24-hour timeframe at KIT, Tiptur.

Leadership

College Coding Club

Organizer

- Coordinated workshops and technical events for student developers.

NSS & Anchoring Team

Member

- Participated in inter-college activities and social service initiatives.
